

## How did they do this?

- Choose a digital humanities project to examine from  
<https://github.com/SouthernMethodistUniversity/intro/blob/master/sections/evaluate.md>

## Goals

- What does this project tell you about its' history?
- How did this project happen?
- Why did this project happen?
- What is their stated purpose/theses?
- What information do they explicitly give you about how and why the project was done?
- What information is elided about how and why the project was done?
- How long did it take?
- How many people worked on it? What kind of expertise and labor were needed?

## Sources

- What data did the project use?
- Was it already assembled?
- If not, what did they do to assemble, modify or clean the data?
- Were there issues around scraping, licensing or copyright?

## Processing

- How was the analysis done?

## Presentation

- How are the conclusions presented?
- Were they presented in multiple formats?
